

Embossing Folder “Sandwich” for Various Thicknesses of Embossing Folders

By Mary Costello, Independent Stampin’ Up! Demonstrator

Regular Embossing Folder (Thinnest variety)

1. Base Plate (Without Thin Die Adaptor) *
2. Clear acrylic plate
3. Embossing folder containing cardstock
4. Another clear acrylic plate

Dynamic Embossing Folder (Thickest variety)

1. Base Plate (Without Thin Die Adaptor) *
2. Dynamic embossing folder containing cardstock
3. Clear acrylic plate

NEW 3D Embossing Folder (Thinner than the Dynamic Folder)

1. Base Plate (Without Thin Die Adaptor) *
2. Embossing folder containing cardstock
3. Blue Embossing Plate (#149658)

(If you do not have the Blue Embossing Plate you can make a substitute for the Blue Plate by using only one acrylic plate and adding a “shim” made from 4 layers of the thick white paper that comes with your DSP. Cut a 12 x 12 sheet into 4 pieces measuring 6 x 6 & use all 4 layers. If too tight, use 3 layers.)

*If you have the old hinged Multipurpose Platform . . .

Lift Tab 2 and place folder on Tab 1 and proceed as above*
